

Information for our customers

Instructions to supply DTP data

Please use Adobe Illustrator for Macintosh or Windows. Please add all pictures and graphic elements you used. Check, whether the used colours are separated according CMYK (except if you wish a spot colour) and whether the used fonts were converted into paths.

You have the choice to use the following programmes

| | |
|-----------------|------------------------|
| System | Adobe InDesign CS 4 |
| Apple Macintosh | Adobe Photoshop CS 4 |
| | Adobe Illustrator CS 4 |
| | Quark XPress 6.5 |
| | Freehand 11.0 |

| | |
|---------------|------------------------|
| System | Adobe InDesign CS 4 |
| Windows | Adobe Photoshop CS 4 |
| | Adobe Illustrator CS 4 |
| | COREL Draw 15 (X5) |

Data transmitting through server FTP

Transmission of data through internet with an FTP-Client or web-browser on our FTP server <ftp.staeger.eu>. More information you find on our homepage www.staeger.eu/en/upload.html.

Important

- | | |
|----------------------------|---|
| Storage medium | Please put an address label on your disc. Please send us your print-outs, so that we can check the result. |
| Spot colours | Spot colours have to be defined according to Pantone. |
| Images | Coloured pictures need to be established in CMYK format (not in RGB/ not indexed). For 150 lpi screening, minimum resolution of images has to be 300 ppi. |
| Supply all elements | Please supply all image and graphic elements, that you used in your document, separately. |
| Proofs | Please make sure you get a contract colour proof. This is for your own security. |
